Sustainability

When deciding on where to manufacture our slings we had one question in mind: where can we be certain to have good working conditions and a proper environmental friendly production? The answer was simple – In Italy, of course! Our ring slings are weaved and sewn by hand in our factory in Como, Italy. They are carefully crafted in 100% ecological and GOTS-certified cotton.

Wash your ring sling | 30 degrees when needed. We care about our planet and you – therefore we suggest you to not wash your Luie sling if not necessary.

All our packaging are 100% climate neutral.
