LEATHER WORKING GROUP - MEMBERSHIP

The Leather Working Group/LWG is a membership organisation comprised of brands, suppliers, leather manufacturers and other stakeholders within the leather manufacturing industry. The group has developed an auditing programme which certifies leather manufacturing facilities based on their environmental compliance and performance capabilities. **100% of our leather footwear is made using LWG certified leather.**

HIGG INDEX

We have partnered with HIGG Co, the developer of the set of sustainability tools called the HIGG Index. These tools allow us to better understand our product sustainability by looking at our production processes, material selection and production locations but also our company's sustainability activities. With the help of the HIGG Index sustainability tools, we are able to improve the impacts of our products and processes on society and the environment.

WHAT IS re-source by DOLOMITE?

re-source by DOLOMITE
IS AN IMPORTANT STEP
FOR US IN BECOMING A
RESPONSIBLE STEWARD
OF OUR PLANET AND
SOCIETY. WE LOOK
FORWARD TO IMPROVING
OUR PRACTICES IN EACH
OF THESE FIELDS.

PEOPLE

We consider that all people involved in our supply chain should be treated fairly with dignity and respect.

PLANET

We take into consideration that the earth's resources must be used in such a way that ecosystems and future generations shouldn't be adversely affected.

PRODUCTS

We aim to maximize the sustainable nature of our products while still maintaining their high level of performance through innovation, technology and design.

RSI CODE OF CONDUCT

Ensuring that all people across our supply chain are treated fairly with respect and dignity is something that we and our customers value. We partnered with the Responsible Sports Initiative (RSI), a project of the World Federation of Sporting Goods Industry. The RSI uses a single code of conduct that all members adhere to.

Our code of conduct covers social and environmental topics that are important for us and for the stakeholders. The ultimate goal is to improve the social and environmental conditions under which our products are produced and distributed. We believe that it is through close collaboration with our valued partners that we will be able to move forward.

CODE OF CONDUCT POINTS:

- + No child labour
- + No forced labour
- + No discrimination
- + No abuse or harassment
- + Freedom of association and collective bargaining
- + Proper compensation and benefits
- + Proper working hours and employment
- + Assure health and safety
- + Support environmental responsible practices

MOUNTAIN PERFORMANCE

FAST HIKING

Fast hiking involves walking at a brisk pace, often requiring good cardiovascular and muscular endurance. It is suitable for individuals who seek a more intense and dynamic activity than traditional hiking but do not want to commit to a long-duration trekking experience.

HIKING

A line designed for outdoor activity lovers and for anyone who has an active and respectful relationship with the natural environment. Light, reliable, comfortable products, available in a range of different models and styles to please everyone, but all benefiting from the same Dolomite experience of the mountain environment.

APPROACH

Products suitable for approach and hiking trails, with the odd rocky section, which end where mountaineering and sport climbing activities begin. Designed to offer agility, speed, lightness and comfort: in a word, versatility.

THE BRAND NEW VERTIS

Vertis is technical footwear model with a contemporary design. It has been developed for approach activities, via ferratas and technical trekking. Designed to support both experienced enthusiasts and those new to the mountains, it delivers reliable performance even in the most challenging environments.

PREMIUM LEATHER & TEXTILE UPPER

Ultra-durable material mix with leather and Textile, built for durability, structure, and abrasion resistance on rugged terrain.

PRECISION

New last providing more precise forefoot feeling with a lower midsole height.

STABILITY

Lower heel-to-toe offset combined with higher sidewalls in the midsole.

PROTECTION

All around protective elements in the upper with durable Vibram outsole..

INTEGRATED TOE PROTECTION

Engineered for durability and protection, this advanced toe guard shields against rocks and debris while enhancing grip and longevity in rugged outdoor conditions

VIBRAM RUBBER COMPOUND

Precision traction with custom lug geometry, co-engineered with Vibram® for improved grip on any terrain. Megagrip™ keep it light, durable and stable.

MONO-DENSITY MIDSOLE

A dedicated EVA foam acts as great shock absorber, plush cushioning, and outstanding comfort on the trail.

THE BRAND NEW AERIS

Designed for versatility, these shoes support light hikes, travel, and urban adventures, offering grip, cushioning, and protection across mixed terrain without compromising style or ease.

LIGHTNESS

Combining new midsole foam with optimized outsole design for a lightweight feeling.

COMFORT

Perfected upper construction for a glove like fit.

CUSHIONING

Maximum cushioning for all day activities.

**INFUSE™ FOAM
MIDSOLE**

The midsole with InFuse™ technology is designed to provide excellent cushioning and absorb impacts on uneven terrain without compromising responsiveness. The result is a smoother, more dynamic and less tiring stride.

TRACTION LUG OUTSOLE

Precision traction with custom lug geometry, co-engineered with Vibram® for improved grip on any terrain. XS-Trek EVO™ keep it light, durable and stable.

FOOTWEAR TECHNOLOGIES

DOLOMITE VERTIS SOLE BY VIBRAM®

The sole, an original Dolomite design featuring the Vibram Megagrip compound and an integrated climbing zone, is divided into two functional areas: the forefoot, optimized for grip and traction, and the heel, designed for braking during descents. The upward wrap of the sole at the toe further increases protection, making the shoe more durable on exposed terrain.

The two-tone midsole with its asymmetrical design helps keep the weight down without compromising on support and protection, ensuring a stable and controlled stride.

NEW LAST DESIGN WITH 8MM DROP.

Optimal balance between comfort, performance, and adaptability. It doesn't excessively load the knee and it reduces stress on the Achilles tendon and calf muscles compared to lower drops (0-4 mm).

This geometry enhances heel cushioning on hard surfaces while maintaining forefoot sensitivity for scrambling and rocky sections. The result is a versatile platform that performs equally well in fast hiking, technical approaches, and mixed mountain movement.

Drop 8mm

INTEGRATED TOE PROTECTION

A durable toe guard designed to protect against debris while improving grip and longevity in rugged terrain.

Front lugs designed to improve traction

Rear lugs designed to improve braking

DOLOMITE AERIS SOLE BY VIBRAM®

The sole features an original Dolomite design, developed with the Vibram XS Trek compound and Traction Lug technology. It ensures reliable grip and traction on mixed surfaces, providing a consistent sense of security throughout the entire journey.

In this specific area the rubber outsole is recessed. The lug height is increased by 1mm to maximize the effectiveness of each tread, boosting grip while reducing overall weight.

INFUSE™ FOAM MIDSOLE

The midsole with InFuse™ technology is designed to provide excellent cushioning and absorb impacts on uneven terrain without compromising responsiveness. The result is a smoother, more dynamic and less tiring stride.

DOLOMITE VERNALE SOLE BY VIBRAM®

Designed for hiking and multi-day treks on mountain trails.

An original sole designed by Dolomite and made with various Vibram compounds: XS Trek or Megagrip for the leather version. It offers great grip and stability thanks to its design concept, characterised by 4,5 mm lugs and two functional areas, such as the front traction area and the rear braking area.

The shock-absorbing X-FOAM midsole, with its double density construction and anti-torsion system, perfectly combines cushioning and stability.

Perimeter lugs design for high stability

Low density X-FOAM for cushioning

Hard density X-FOAM for stability

VIBRAM® COMPOUNDS

The secret of Vibram® performance is the optimal combination of hyperfunctional DESIGN and exclusive RUBBER COMPOUNDS. For more than 80 years Vibram® has been delivering the most advanced soles to the market. Vibram® soles are known for use in outdoor sports such as mountaineering, hiking, trail running, motorcycling as well as for casual and industrial applications. The Vibram® yellow octagon has become the gold standard of quality and performance throughout the footwear industry.

XS TREK

BENEFITS:

- Optimal balance of traction and durability
- Responsive on unpredictable terrain
- Engineered for stability and comfort

BEST FOR:

- All terrain conditions
- Long lasting
- Abrasive terrain
- Long distance

XS TREK EVO

BENEFITS:

- Perfect blend of traction and long-lasting performance
- Quick to adapt on challenging surfaces
- Designed for enhanced stability and comfort

BEST FOR:

- All terrain conditions
- Long lasting
- Abrasive terrain
- Long distance

MEGAGRIP

BENEFITS:

- Unparalleled grip on wet and dry surfaces
- Superior grip with rugged longevity
- Optimal balance of stability and flexibility for ground adaptation

BEST FOR:

- Wet/slippery technical terrains
- All terrain conditions
- Technical approach, technical path
- Extremely technical trailrunning
- Wet/slippery conditions

ICETREK

BENEFITS:

- Superior grip on icy surfaces and cold terrain
- Engineered for low to very low temperatures
- Rubber compound suitable for indoor/outdoor

BEST FOR:

- Cold/icy conditions
- Winter hiking, rough conditions

ECOSTEP

BENEFITS:

- Made from a minimum of 30% recycled rubber
- High-quality compound formulation
- Embodies Vibram's dedication to environmental conservation

BEST FOR:

- Soft terrains
- Eco-friendly attitude
- Soft terrain trailrunning
- Unique look

GORE-TEX

PRODUCT TECHNOLOGY?

Products designed with GORE-TEX laminates are waterproof in time and with optimal breathability. The GORE-TEX membrane is the core of all GORE-TEX products. Thanks to its microporous structure it has some surprising features.

BREATHABLE/WATERPROOF

The GORE-TEX membrane is an extremely thin layer of expanded polytetrafluoroethylene (ePTFE). It numbers over 1.4 billion pores per cm². The pores in fact determine the properties of GORE-TEX materials - waterproofing and breathability.

WHAT DOES THIS MEAN?

“Breathability” is one of the most misunderstood concepts in outdoor products manufacture. It is not, as many believe, the capacity of a fabric to allow air through, but instead refers to its capacity to release perspiration in the form of water vapour. Our standards require our fabrics to breathe during intensive physical exercise in order to allow the perspiration to evaporate easily.

WHY IS THIS IMPORTANT?

When you are active your skin eliminates excess heat through transpiration. To avoid an unpleasant accumulation of sweat, the GORE-TEX membrane allows the evaporating moisture to exit through the fabric. This breathability allows the skin to be kept drier and more comfortable, even during extreme physical effort.

Footwear designed with the GORE-TEX product technology can easily be identified thanks to the GORE-TEX brand label attached to the outside.

The laminate for GORE-TEX footwear is inserted during construction of the shoe, in its interior, like a lining.

Irrespective of the weather conditions GORE-TEX footwear keeps feet dry, ensuring optimal climatic comfort. All GORE-TEX footwear combines lasting waterproofing and optimal breathability and offers our GUARANTEED TO KEEP YOU DRY™ promise.

GORE-TEX INVISIBLE FIT

GORE-TEX Invisible Fit Products provide durably waterproof, windproof, and breathable protection with a long product life; they are PFAS-free* with a reduced carbon footprint.

HOW IT WORKS

GORE-TEX Invisible Fit product technology features an innovative membrane and carefully selected textiles that are invisibly bonded to the shoe upper for the same true fit as its unprotected equivalent. The rigorous testing and proven material expertise for specific uses enable durable performance.

This unique, lighter construction reduces weight and eliminates wrinkles, folds, and stitching abrasions, for full freedom of movement without compromising the toe box. There are fewer pressure points exposed, enhancing your support and all-day comfort, so you'll be able to increase your mileage and do more with less distraction.

*Made without intentionally added per- and polyfluorinated substances.

DAS DOLOMITE ANATOMIC SYSTEM

DAS is the construction system used to produce most of the models in the Dolomite collection.

Its aim is to ensure that the internal shape of the footwear follows the anatomy of the foot itself as closely as possible, and to comply with the natural biomechanics of the foot.

By keeping the impact of footstrike to a minimum and facilitating natural movements, extraordinary levels of comfort and safety can be achieved.

DAS shoes are designed to meet the demands of different sporting activities, carefully balancing **performance, comfort, lightness, reliability and sturdiness**.

The system comprises:

ANATOMICAL LAST

The surfaces and volumes of DAS lasts reproduce the anatomy of the average human foot, creating a precision fit and superior comfort.

TRADITIONAL LAST

DAS LAST

ANATOMICAL FOOTBED

The removable footbed provide the right support, improving stability by distributing body weight evenly and keeping the foot in a correct position.

DOLOMITE PERFORMANCE FOOTBED

The new bi-density footbed provide the right support, improving stability by distributing body weight evenly and keeping the foot in a correct position.

The women's footbeds are designed with an added rear insert to ensure heightened comfort.

Antibacterial surface fabric derived from recycled materials

The upper part is made from soft density foam to offer enhanced comfort. It's made by breathable material, sourced from recycled materials.

Felt with anti-torsion capabilities

Hard density foam in the rear for stability and arch support

DOLOMITE WRAPPING SYSTEM

The “Dolomite Wrapping System” is an elasticized construction, composed of tongue and collar that wraps comfortably instep and ankle. It improves wearers sense of comfort, protection and precision of movement for the entire duration of the activity.

BENEFITS:

1. Increased comfort levels
2. Improved performance
3. Improved precision of movement

WOMAN FIT

Dolomite's anatomical and traditional lasts are the result of years of experience in the footwear business. They are constantly updated to keep pace with evolving trends in outdoor activities and with consumer demand.

MAN FIT

WOMAN FIT

The anatomy of women's foot differs from the men's one, in terms of sizes and sensitivity. This led us to develop a dedicated anatomical last specifically thought and designed for women's feet, to offer the best feeling possible to every Dolomite wearer.
