re-source by DOLOMITE
IS AN IMPORTANT STEP
FOR US IN BECOMING A
RESPONSIBLE STEWARD
OF OUR PLANET AND
SOCIETY. WE LOOK
FORWARD TO IMPROVING
OUR PRACTICES IN EACH
OF THESE FIELDS.

PEOPLE

We consider that all people involved in our supply chain should be treated fairly with dignity and respect.

PLANET

We take into consideration that the earth's resources must be used in such a way that ecosystems and future generations shouldn't be adversely affected.

PRODUCTS

We aim to maximize the sustainable nature of our products while still maintaining their high level of performance through innovation, technology and design.

LEATHER WORKING GROUP - MEMBERSHIP

The Leather Working Group/LWG is a membership organisation comprised of brands, suppliers, leather manufacturers and other stakeholders within the leather manufacturing industry. The group has developed an auditing programme which certifies leather manufacturing facilities based on their environmental compliance and performance capabilities.

HIGG INDEX

We have partnered with HIGG Co, the developer of the set of sustainability tools called the HIGG Index. These tools allow us to better understand our product sustainability by looking at our production processes, material selection and production locations but also our company's sustainability activities. With the help of the HIGG Index sustainability tools, we are able to improve the impacts of our products and processes on society and the environment.

WHAT IS re-source by DOLOMITE?

re-source APPAREL

- EITHER USING MINIMUM 50% OF RECYCLED MATERIALS
- EITHER CREATED WITH 100% CERTIFIED RENEWABLE MATERIALS
- USING ONLY PFC FREE DWR (DURABLE WATER REPELLENCE) TREATMENTS

55 %

labelled re-source by DOLOMITE

100%

of the DWR is PFC Free

re-source FOOTWEAR

RE-SOURCE BY DOLOMITE LIFESTYLE FOOTWEAR PRODUCTS ARE DEFINED BY THE USE OF RECYCLED, BIO-BASED AND / OR RENEWABLE MATERIALS CERTIFIED BY 3RD PARTIES, REPRESENTING A MINIMUM OF 40% MORE ECO-RESPONSIBLE MATERIALS BY WEIGHT

40%

of lifestyle footwear are labelled re-source by DOLOMITE

94%

of lifestyle footwear are made **certified** LWG leather

97%

of performance footwear are made **certified** LWG leather

RSI CODE OF CONDUCT

Ensuring that all people across our supply chain are treated fairly with respect and dignity is something that we and our customers value. We partnered with the Responsible Sports Initiative (RSI), a project of the World Federation of Sporting Goods Industry. The RSI uses a single code of conduct that all members adhere to.

Our code of conduct covers social and environmental topics that are important for us and for the stakeholders. The ultimate goal is to improve the social and environmental conditions under which our products are produced and distributed. We believe that it is through close collaboration with our valued partners that we will be able to move forward.

CODE OF CONDUCT POINTS:

- + No child labour
- + No forced labour
- + No discrimination
- + No abuse or harassment
- + Freedom of association and collective bargaining
- + Proper compensation and benefits
- + Proper working hours and employment
- + Assure health and safety
- + Support environmental responsible practices

by  DOLOMITE

ECO MATERIALS - FOOTWEAR

LWG certified leather

The Leather Working Group/LWG promotes responsible environmental practices across the leather supply chain.

Vibram Eco-Step

Eco-friendly/recycled rubber compound; made from a minimum of 30% recycled rubber; high-quality compound formulation; embodies Vibram's dedication to environmental conservation.

Recycled lining

The lining is made by 100% of recycled polyester.

Recycled footbed

The footbed is made of 100% recycled mesh + Mounded EVA with 20% recycled EVA grains. The insole is completely made of 100% natural cork.

Recycled laces

Laces are made of 100% recycled PET. **G**

Recycled midsole Eva

Midsole is made with minimum 20% of recycled compound.

ECO MATERIALS - APPAREL

RDS

100% of the down used is sourced from certified farms and processed using environmentally-friendly detergents.

RECYCLED POLYESTER

The origin of all our recycled polyester is GRS and RCS certified, is from recycled contents and diverted waste from ending up in landfills or the environment.

UNHARMFUL AND MORE SUSTAINABLE FABRICS

All our fabrics are certified by bluesign or Oekotex. These two certifications guarantee that no harmful substances are detected on the final fabric, therefore the garment is harmless for human health.

MOUNTAIN PERFORMANCE FOOTWEAR

HIKING

A line designed for outdoor activity lovers and for anyone who has an active and respectful relationship with the natural environment. Light, reliable, comfortable products, available in a range of different models and styles to please everyone, but all benefiting from the same Dolomite experience of the mountain environment.

APPROACH

Products suitable for approach and hiking trails, with the odd rocky section, which end where mountaineering and sport climbing activities begin. Designed to offer agility, speed, lightness and comfort: in a word, versatility.

MOUNTAINEERING

Products suitable for climbing routes, via ferrata and high altitudes in summer conditions. They include all the features you would expect in a mountaineering shoe, and are highly-evolved in order to ensure great performance, comfort and safety.

NEW

RANGE OF USE: Backpacking, Hiking
SIZE: 3 UK-8.5 UK

DOLOMITE VERNALE SOLE BY VIBRAM®

ABOUT

Designed for hiking and multi-day treks on mountain trails.

An original sole designed by Dolomite and made with various Vibram compounds: XS Trek or Megagrip for the leather version. It offers great grip and stability thanks to its design concept, characterised by 4,5 mm lugs and two functional areas, such as the front traction area and the rear braking area.

The shock-absorbing X-FOAM midsole, with its double density construction and anti-torsion system, perfectly combines cushioning and stability.

BENEFITS:

GRIP, TRACTION, CUSHIONING

1. Perimeter lugs design for high stability
2. Low density X-FOAM for cushioning
3. Hard density X-FOAM for stability
4. TPU anti-torsion shank

RANGE MODEL

- Vernale Leather High GTX M's
- Vernale Leather High GTX W's

- Vernale High GTX M's
- Vernale High GTX W's

TPU anti-torsion shank

DOLOMITE NEW HIKER SOLE BY VIBRAM®

ABOUT

Designed for travel, active walking and fast hiking on mountain trails.

An original sole, designed by Dolomite and crafted XS Trek Vibram compound. It offers great grip and stability, thanks to the Vibram Traction Lug design concept with 4,5mm lugs. The empty design solution on the front and back area, enhance the flexibility while increasing the overall sole lightness.

The shock-absorbing EVA midsole, offers great cushioning during dynamic activities, increasing the stability thanks to the ESS anti-torsion insert.

BENEFITS:

LIGHTNESS, GRIP, FLEXIBILITY

1. External Vibram Traction Lug design for stability and grip
2. Empty lines design for flexibility and lightness
3. EVA cushioning for comfort
4. ESS insert for anti-torsion

RANGE MODEL

- Nibelia High Gtx W's

DOLOMITE CRODANERA TECH SOLE BY VIBRAM®

ABOUT

Designed for light hiking, fast hiking, active walking on mountain trails.

Excellent shock absorption during dynamic activities thanks to the bi-density Eva midsole, outsole with adherent profile, optimum sure-footed step on uneven surfaces.

The specific rubber bottom design, combined with Vibram Megagrip compound, provides grip and traction in every terrain.

BENEFITS:

STABILITY, TRACTION, DURABILITY, ADHERENCE

1. Broad shape in the toe and heel to enhance GRIP
2. Small squared design lugs for a better multi-point TRACTION
3. External lugs area to optimize STABILITY
4. Self cleaning open design
5. Hard PP shank for STABILITY
6. Soft Eva back area for CUSHIONING

RANGE MODEL

- Croda Nera GTX M's
- Croda Nera GTX W's

Recycled compound

APPROACH TECH SOLE BY VIBRAM®

ABOUT

Designed for mountain approach on short distance and scrambling. Pronounced heel and lugs provide braking on descents and grip on climbs.

Excellent shock absorption during dynamic activities thanks to the bi-density Eva midsole.

The specific rubber bottom design, combined with Vibram Megagrip compound, provides grip and traction on every terrain.

BENEFITS:

STABILITY, TRACTION, DURABILITY

1. Multidirectional lugs for traction and stability
2. Integrated climbing zone
3. Asymmetrical design defines heel impact zone
4. Hard EVA front area for stability
5. Soft EVA back area for cushioning
6. Asymmetrical design guarantees best performance

DOLOMITE CAREZZA SOLE

ABOUT

Designed for travel, every day use and walking.

Bottom is defined in 3 different areas, where lugs are designed for a specific function: lightness, stability and flexibility. The midsole design, with its sinuous lines highlighting foot anatomy, provides comfort and flexibility.

Crafted with eco-sustainable materials such as recycled eva and rubber compound with recycled powder.

Ergonomics and eco-sustainability are the basis of the sole's design.

BENEFITS:

LIGHTNESS, COMFORT, FLEXIBILITY, ECO-SUSTAINABILITY

1. Multidirectional traction lugs for stability
2. Flexibility area
3. Empty "S" Design increase lightness
4. Eva cushioning for comfort.

The secret of Vibram® performance is the optimal combination of hyperfunctional DESIGN and exclusive RUBBER COMPOUNDS. For more than 80 years Vibram® has been delivering the most advanced soles to the market. Vibram® soles are known for use in outdoor sports such as mountaineering, hiking, trail running, motorcycling as well as for casual and industrial applications. The Vibram® yellow octagon has become the gold standard of quality and performance throughout the footwear industry.

XS TREK

BENEFITS:

- Optimal balance of traction and durability
- Responsive on unpredictable terrain
- Engineered for stability and comfo

BEST FOR:

- Optimal balance of traction and durability
- Responsive on unpredictable terrain
- Engineered for stability and comfort

MONT

BENEFITS:

- Tested on the world's highest peaks
- Maintains performance at extremely low temperatures
- Firmer compound for maximum support and durability

BEST FOR:

- Extremely long wearing
- Winter sports, mountaineering

MEGAGRIP

BENEFITS:

- Unparalleled grip on wet and dry surfaces
- Superior grip with rugged longevity
- Optimal balance of stability and flexibility for ground adaptation

BEST FOR:

- Wet/slippery technical terrains
- All terrain conditions
- Technical approach, technical path
- Extremely technical trailrunning
- Wet/slippery conditions

ICETREK

BENEFITS:

- Superior grip on icy surfaces and cold terrain
- Engineered for low to very low temperatures
- Rubber compound suitable for indoor/outdoor

BEST FOR:

- Cold/icy conditions
- Winter hiking, rough conditions

ECOSTEP

BENEFITS:

- Made from a minimum of 30% recycled rubber
- High-quality compound formulation
- Embodies Vibram's dedication to environmental conservation

BEST FOR:

- Soft terrains
- Eco-friendly attitude
- Soft terrain trailrunning
- Unique look

VI-LITE

BENEFITS:

- Ultimate in lightness
- Optimum balance of lightness and durability
- Ideal for working on your feet & long walks in the park

BEST FOR:

- Wearable for urban long walk
- Compromise between lightness & durability

ARCTIC GRIP

BENEFITS:

- Unsurpassed on slippery, wet ice surfaces
- Outstanding balance between grip and durability
- Calibrated for extreme cold 32° F/0°C

BEST FOR:

- Travelling
- Light Outdoor Activities & Everyday Wear

PRODUCT TECHNOLOGY?

Products designed with GORE-TEX laminates are waterproof in time and with optimal breathability. The GORE-TEX membrane is the core of all GORE-TEX products. Thanks to its microporous structure it has some surprising features.

BREATHABLE/WATERPROOF

The GORE-TEX membrane is an extremely thin layer of expanded polytetrafluoroethylene (ePTFE). It numbers over 1.4 billion pores per cm². The pores in fact determine the properties of GORE-TEX materials - waterproofing and breathability.

WHAT DOES THIS MEAN?

“Breathability” is one of the most misunderstood concepts in outdoor products manufacture. It is not, as many believe, the capacity of a fabric to allow air through, but instead refers to its capacity to release perspiration in the form of water vapour. Our standards require our fabrics to breathe during intensive physical exercise in order to allow the perspiration to evaporate easily.

WHY IS THIS IMPORTANT?

When you are active your skin eliminates excess heat through transpiration. To avoid an unpleasant accumulation of sweat, the GORE-TEX membrane allows the evaporating moisture to exit through the fabric. This breathability allows the skin to be kept drier and more comfortable, even during extreme physical effort.

Footwear designed with the GORE-TEX product technology can easily be identified thanks to the GORE-TEX brand label attached to the outside.

The laminate for GORE-TEX footwear is inserted during construction of the shoe, in its interior, like a lining.

Irrespective of the weather conditions GORE-TEX footwear keeps feet dry, ensuring optimal climatic comfort. All GORE-TEX footwear combines lasting waterproofing and optimal breathability and offers our GUARANTEED TO KEEP YOU DRY™ promise.

GORE-TEX WITH ePE MEMBRANE

The new GORE-TEX products based on ePE (expanded polyethylene) membranes offer trusted best-in-class performance and durability with a low environmental footprint.

So when you wear a footwear that contains this tech, you know you are choosing to reduce your footprint with the same waterproof, windproof and breathable guarantee

PERFORMANCE

- Durably waterproof
- Reliably breathable
- Totally windproof
- GUARANTEED TO KEEP YOU DRY

DOLOMITE WRAPPING SYSTEM

The “Dolomite Wrapping System” is an elasticized construction, composed of tongue and collar that wraps comfortably instep and ankle. It improves wearers sense of comfort, protection and precision of movement for the entire duration of the activity.

BENEFITS:

1. Increased comfort levels
2. Improved performance
3. Improved precision of movement

DAS is the construction system used to produce most of the models in the Dolomite collection.

Its aim is to ensure that the internal shape of the footwear follows the anatomy of the foot itself as closely as possible, and to comply with the natural biomechanics of the foot.

By keeping the impact of footstrike to a minimum and facilitating natural movements, extraordinary levels of comfort and safety can be achieved.

DAS shoes are designed to meet the demands of different sporting activities, carefully balancing **performance, comfort, lightness, reliability and sturdiness.**

The system comprises:

ANATOMICAL LAST

The surfaces and volumes of DAS lasts reproduce the anatomy of the average human foot, creating a precision fit and superior comfort.

ANATOMICAL FOOTBED

The removable footbed provide the right support, improving stability by distributing body weight evenly and keeping the foot in a correct position.

TRADITIONAL LAST

DAS LAST

WOMAN FIT

Dolomite's anatomical and traditional lasts are the result of years of experience in the footwear business. They are constantly updated to keep pace with evolving trends in outdoor activities and with consumer demand.

The anatomy of women's foot differs from the men's one, in terms of sizes and sensitivity. This led us to develop a dedicated anatomical last specifically thought and designed for women's feet, to offer the best feeling possible to every Dolomite wearer.

THINNER FOREFOOT PROPORTIONS FOR IMPROVED COMFORT.

PRODUCT ICONS

DOLOMITE has organized a series of icons for an easy and quick understanding.

FITTING

Dolomite's anatomical and traditional lasts are the result of years of experience in the footwear business. They are constantly updated to keep pace with evolving trends in outdoor activities and with consumer demand, which is shifting increasingly towards high-performance products.

The anatomy of the foot, personal sensitivity and the types of activities pursued are all highly variable, leading us to develop our products on a range of different lasts in order to obtain different fits and meet the needs of all types of customers.

FLEXIBILITY INDEX

The various degrees of flexibility depend on a combination of elements such as insoles, reinforcements, soles.

These are assembled in accordance with the expected activity and personal ability and experience.

COMPATIBILITY CRAMPONS

Dolomite indicates the compatibility of the item with the hooking of automatic or semi-automatic crampons.

APPAREL
TECHNOLOGIES

FUNCTIONAL FABRICS WITH MEMBRANE

2L (2 layers), 2.5L (2.5 layers) and 3L (3 layers) fabrics have a membrane that protects against weather conditions such as wind and rain. At the same time, they provide moisture management by transferring heat and sweat to the outside, which ensures high wearing comfort. While the 2L fabrics consist of only two components: outer fabric and membrane. The 2.5L fabrics are characterized by an additional print on the membrane, which allows them to be worn directly on the skin. The 3L fabric has one more layer, the lining. It protects the membrane and, depending of the type of lining, additional function can be supplemented.

BENEFITS:

- DWR CO/PFC-free
- Breathable
- 10'000 breathability - 40'000 breathability MVTR (test : JIS 1099 B1)
- Wind-resistant
- Water-resistant
- 15'000 water column - 30'000 water column (test : JIS L1092 B)

LIGHT WEIGHT 20D FABRIC

For our synthetic insulated jacket, we use lightweight 20 denier fabrics as plain weave or with a mini ripstop. The fabric performs with its lightness and durability. All the fabrics are treated with a CO/PFC free - DWR (Durable Water Repellent) treatment.

BENEFITS:

- Lightweight
- below 40g/square meter
- DWR - CO/PFC free
- Water-repellent
- 100% recycled content
- High breathability
- High comfort

The unique drirelease® custom blend of synthetic and natural fibers accelerates the water release rate of the fabrics pushing water and perspiration to the outside of the garment into the air, faster than most other performance fabrics available on the market, without chemicals. The performance of drirelease is permanent and eco-friendly.

BENEFITS:

- Moisture wicking
- Fast drying
- Permanent performance
- Superior comfort

SYNTHETIC LOOSE FIBER INSULATION

The Synthetic Loose Fiber Insulation is made of 100 % recycled polyester. Synthetic loose Fiber Insulation is softer and warmer than conventional padding, it offers a higher level of flexibility, with the reduction of clumping issue, while improves the washability.

BENEFITS:

- Balanced Loft & Softness
- Eco-friendly
- Highly warmth
- Superior softness
