Pure PETA- certified sustainable fashion!

Green Laces premium vegan footwear is produced to the highest ethical and sustainable standards. Free from PVC and chrome, in accordance with REACH Regulation 1907:2006 (Concerning the registration, evaluation, authorisation and restriction of chemicals) and without the use of any animal-derived components, as a PETA certified brand. Using onMicro® microfiber vegan leather that is Oeko-tex® certified Standard 100 and sustainably sourced natural rubber. All our shoes are recyclable, so they can be returned at the end of their lifecycle and go into our recycling program.

About us

Established in 2010, Green Laces is the leading Scandinavian retailer of ethical and sustainably produced shoes and accessories, where style and comfort are equally important.

Through years of experience and a belief that ethics and style should not contradict each other, the Green Laces brand of footwear was launched in 2021. A collection of contemporary, fashion forward, premium vegan footwear with a focus on ethics, sustainability, and inclusiveness.

Nina Färdig, CEO & Founder

GREEN LACES

STOCKHOLM

Retail

The Green Laces brand is an extension of the concept store in Stockholm, Sweden. A carefully curated multi-brand retailer with a unique environment that feels contemporary, fashion forward yet conscious. A warm, inviting and inspirational atmosphere where everyone is welcome in a positive open-minded space.

We want to offer easily accessible information about non-animal materials, their benefits and how to make environmentally friendly and ethical choices when shopping for footwear.

Community

One of the driving forces behind Green Laces is our dedicated community, with a unique sense of togetherness, and knowledge. A place where we embrace transparency, open communication and are inspired by passionate people, music, arts, human and animal rights movements. A community where aesthetics and ethics are seamlessly interconnected.

Production

The Green Laces brand is PETA certified, guaranteeing our footwear has been manufactured without the use of any animal-derived components. We design, develop and produce premium footwear with attention to detail, comfort, and style, while ensuring it does not increase the wearer's ecological footprint.

Our soles are made from sustainably sourced natural rubber, with uppers in the highest quality Oeko-tex certified vegan leather. The non-animal derived material is free from toxins, breathable, antibacterial, and eco-friendly, yet retains the characteristics and durability of cowhide. We are fully transparent in our partnership with the factory, with fair working conditions at all stages of production being of the utmost importance to us.
