THE LIZARD STORY

Founded in 1992 by an Italian family with almost 100 years of shoemaking experience, LIZARD was born from a passion for the outdoors. With a need for freedom and the urge to be outdoors, the first LIZARD sandals were designed to explore the world, letting each user move freely, yet extremely surefooted. Since then, LIZARD has evolved but stayed true to its roots to keep inspiring free-spirited outdoor lovers all over the planet.

At LIZARD, we care about every detail of our products and we are constantly researching the most rugged, tenacious and innovative new materials and technologies. Lightweight design, unbeatable grip and maximum comfort are our guiding principles for creating footwear for the outdoors. Originating with the philosophy of anatomical-fitting sandals, to give a close-to-the-ground, barefoot walking experience, we are excited to expand and now introduce our newest, progressive fits to the S24 collection, for a modern sandal fit.

The responsible choice for the environment, and our feet, LIZARD footwear offers unbeatable comfort and durability that can journey for miles and miles on the trail.

FOR LIFE ON THE

Move

The sandals in our 2024 collection have been designed with this claim in mind, meaning no matter how you move in the outdoors, we have a sandal to suit every type of adventure. Whether you are hiking in the Dolomites, cruising along the river trail, or exploring from your doorstep, you can be assured that a pair of Lizard sandals will be your most valued companion, for your life on the move.

* For life on the move
