JOHN DEERE

John Deere was a blacksmith who developed the first commercially successful, self-scouring steel plow in 1837 and founded the company that still bears his name. For 185 years John Deere has led the way in developing innovative solutions to help our customers become more productive.

Our founder's formula was simple: See a need. Innovate a solution. Then keep innovating to make our product even better. From our revolutionary steel plow in 1837 to our smart machines and precision technology of today, we've never stopped improving for the good of the people we serve. And we never will.
