

A photograph of a man and a woman running on a dirt trail through a forest. The man is in the foreground, wearing a white shirt and black shorts. The woman is slightly behind him, wearing a light green shirt and black shorts. A large, thick, white wavy line curves across the upper half of the image, partially obscuring the background. The text '2026 RUNNING SPRING/SUMMER WORKBOOK' is overlaid in the bottom left corner in a bold, white, sans-serif font.

# EVERY LINE TELLS A STORY. WRITE YOURS

In running as in life, lines shape our journey; start lines to ignite possibility, finish lines define triumph, laughter lines from moments shared, and the line of the new trail that leads to discovery. There are lines to cross, adventures to explore and paths which challenge us to grow. Some lines inspire us, others test us, but all lead to stories waiting to be told. Every line tells a story, write yours...

#NOSHORTCUTS

## RE-SOURCE BY SCOTT

It is an important step for us in becoming a responsible steward of our planet and society. We look forward to improving our practices in each of these fields.

### PEOPLE

We consider that all people involved in our supply chain should be treated fairly with dignity and respect.

### PLANET

We take into consideration that the earth's resources must be used in such a way that ecosystems and future generations shouldn't be adversely affected.

### PRODUCTS

We aim to maximize the sustainable nature of our products while still maintaining their high level of performance through innovation, technology and design.

SINCE 2021

## CLIMATE ACTION TRAINING

In late 2023, we came together with other companies in the cycling industry to co-develop a Climate Action Training programme to drive down greenhouse gas emissions in our shared supply chains. This initiative has been facilitated by Shift Cycling Culture and the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) and hopes to create a blueprint for future collaborative projects of the industry.

This training tool is no complete and we are rolling this out within our supply chain in order to help our partners measure, evaluate and mitigate the impact of their processes.

By participating and implementing the learnings from the Climate Action Training, we have ensured that all parties are speaking the same language and working together in reducing the industry's environmental impact.

## TRACTION MATTERS

### TRACTION IN RUNNING IS THE FRICTION BETWEEN AN OUTSOLE AND THE SURFACE.

Whereas grip describes a static state, traction is characterized by the active balance of foothold in motion which is essential to run efficiently. Depending on the surface and type of runner an outsole must display different properties. By conducting scientific research projects with INDUSTRY-LEADING experts at the technical university of munich and our elite athlete team AS WELL AS DOING extensive field testing we are able to identify the requirements for an outsole to provide the best possible traction depending on its field of use.

## THE SCIENCE OF TRACTION

Technical University of Munich is one of Europe's top universities, running 15 academic departments with over 41,000 students, and to date winning 15 Nobel prizes. To develop the best traction solutions for our running footwear we established a collaboration with Technical University of Munich in 2015. With their technical knowhow and scientific approach, we are able to explore and identify the mechanisms and crucial details of traction that result in our advanced outsole designs to enhance running performance.

Under the lead of Prof. Veit Senner, Head of the Department of Sports Equipment and Materials, a team of researchers has been designing, building and evolving a unique machine to test our running shoes and materials for their traction behavior and performance. Taking their results and recommendations into account. We are able to develop our elaborate outsole designs to result in the ideal SCOTT Traction Solutions.

### TRACTION SOLUTIONS

#### SOFTGROUND TRACTION

Deep 7mm lugs aid traction on our softground outsole. Designed for muddy terrain as well as rocky outcrops, this outsole is for racing over the most extreme of terrains.

#### RADIAL TRACTION

With a bite face for traction and an outer face that escapes mud the lugs are able to rotate through the surface while offering unparalleled traction in a 360 degree sphere. This outsole is for running in the most technical exposed mountain environments.

#### VERSATILE TRACTION

With its fully redesigned lugs the outsole bites into the different levels of rocks, roots and trail features to optimize the ground contact and enhance traction. This outsole is ideal for hardpack rolling trails.

#### ULTRA TRACTION

Our Ultra Traction outsole is designed specifically ultra races on fast rolling trails. Utilizing a semi radial design to give maximum efficiency in forward motion while maintain multi direction traction elements to keep you feeling confident when the trail starts to twist and turn. Our newest traction solution is best suited to fast, smooth summer trails of any distance at any speed.

#### FLAT TRACTION

The outsole features a large stable surface area in contact with the ground for optimal traction even in wet conditions. Designed to enhance efficient running on road and hardpack surfaces, it has high levels of durability.

## SHOES TECHNOLOGIES

### AERO FOAM+

AeroFoam+ focusses on a cushioned but stable ride and is used in most of our trail running shoes. It is durable with dynamic rebound to offer protection while maintaining an efficient stride.

### KINETIC FUSION FOAM

Kinetic Fusion™ is our latest proprietary foam technology, engineered in-house to deliver the ultimate balance of lightness, responsiveness, and durability. By fusing EVA and PEBAX, we've created a high-performance midsole that absorbs impact, returns energy, and maintains consistent feel in all temperatures. Designed for the trail but built for any run, it offers a smooth, propulsive ride that keeps you moving effortlessly, no matter the distance or conditions.

### eRIDE MIDSOLE

The unique rocker shape of our eRIDE Midsole creates a very stable midstance, promoting the faster and more efficient running style that runners strive for. Regardless of running style eRIDE works with the body to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency.

**MATRYX®**

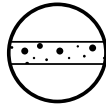

### MATRYX®

Combining lightness, breathability, resistance, support and sustainability in one package. MATRYX® delivers all of these properties. Each yarn is coated individually to prioritise resistance and guarantee long-term performance and safety every step of the way. This ensures you are prepared to tackle every type of terrain on the trails.

**CORDURA®**

### CORDURA®

Designed for living and built to last, the original durable CORDURA® fabric has proven performance in many of the world's toughest environments. Made with high tenacity air jet textured nylon 6,6 filament yarns.

### KINETIC LIGHT FOAM

KINETIC LIGHT FOAM is our ever evolving proprietary foaming technology. Enhancing the properties of our existing high-rebound midsoles, this lightweight foam has even more rebound in an even lighter package. Soft, light and responsive, but with high levels of durability. You get more energy back so you can run faster for longer.

### KINETIC FOAM

The SCOTT KINETIC FOAM is a lightweight and very responsive foam. It returns 14% more energy than standard EVA (Ethylene-vinyl acetate) resulting in a plush but stable and more dynamic run. You get more energy back so you can run faster for longer.

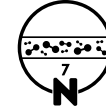

### EVOLVED ROCKER2

Evolved Rocker2 builds on 10 years of continued R&D, creating our most efficient running platform yet. ER2 applies our advanced understanding of biomechanical principles to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency. Simply put, you can run faster for longer, with less energy.

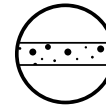

### GORE-TEX

For decades, GORE-TEX shoes have provided comfort and protection in all weather conditions. The microscopic pores of the GORE-TEX Membrane are impenetrable for rain and humidity but let sweat and heat escape, keeping your feet warm and dry. The result? Our GUARANTEE TO KEEP YOU DRY promise.

### KINETIC NITROGEN FOAM

At SCOTT, we've spent years testing and refining our midsole technology to push the limits of comfort, rebound, and durability. Unlike traditional foams, our Kinetic Nitrogen Foam uses a supercritical foaming process to infuse nitrogen under precise heat and pressure. This creates a softer, lighter, and more responsive midsole with a more consistent ride in any temperature—whether it's freezing cold or scorching hot. The result? Unmatched cushioning, explosive energy return, and a smoother, more efficient run.

### KINETIC LIGHT FOAM

KINETIC LIGHT FOAM is our ever evolving proprietary foaming technology. Enhancing the properties of our existing high-rebound midsoles, this lightweight foam has even more rebound in an even lighter package. Soft, light and responsive, but with high levels of durability. You get more energy back so you can run faster for longer.

### EVOLVED ROCKER3

We have developed a new Rocker Technology, the ER3. While ER2 technology optimises impact control and an efficient running stride, ER3 adds a third plane; medio-lateral guidance. The geometry is designed to guide runners through their natural stride and provide support where needed.

### Re-source by SCOTT

At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

## APPAREL

### WIND & WATER PROTECTION

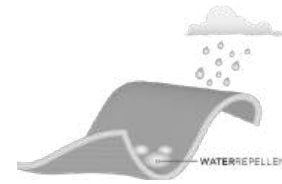

#### DRYOSPHERE

DRYOsphere fabrics provide a waterproof/breathable barrier from the elements. A shield against water and wind, DRYOsphere fabric also allows for water vapor to escape from the body, keeping you dry and comfortable in any condition.

#### DRYOZONE DWR

The first line of defense against precipitation, DRYOzone DWR (durable water repellent) is applied to fabrics to protect against saturation season after season.

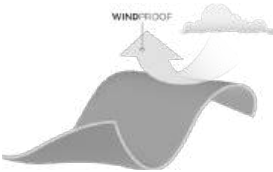

#### GORE-TEX INFINIUM™ WINDSTOPPER® GARMENTS

Products engineered with GORE-TEX INFINIUM™ WINDSTOPPER® product technology offer absolute windproofness while being extremely breathable. The latest enhancements to our GORE-TEX INFINIUM™ WINDSTOPPER® laminates are designed for exceptional skin comfort.

#### DUROBREEZE

DURObreeze fabrics act as a barrier against the wind. This windproof technology works by resisting wind penetration, helping prevent heat loss during breezy conditions.

#### PERTEX® SHIELD

Pertex® Shield delivers lightweight and packable waterproof protection whilst remaining highly breathable.

#### PERTEX® QUANTUM AIR

Pertex® Quantum Air is engineered with increased air permeability to provide a balance between wind resistance and breathability.

#### GORE-TEX PERFORMANCE GARMENTS

Designed for when your outdoor adventures get wet—very wet. Whether you're exploring a national park with friends on a multi-day trekking trip in pouring rain, or encountering heavy snowfalls when riding the perfect tree run, these totally water- and windproof garments with the GUARANTEED TO KEEP YOU DRY™ promise provide long-lasting breathability and solid protection so you can take your journey further.

### QUICK-DRYING & HIGHLY BREATHABLE FABRICS

#### SUPERLIGHT

SL technology is a specialized innovation designed for runners who prioritize lightweight, high-performance gear. Engineered to meet the demands of those seeking comfort and efficiency over long distances, this technology enhances every stride, providing the ideal balance of support and responsiveness for extended runs.

#### DRIRELEASE® ECO

The unique Drirrelease® custom blend of synthetic and natural fibers accelerates the water release rate of the fabrics pushing water and perspiration to the outside of the garment into the air, faster than other performance fabrics available on the market, without chemicals. The performance of drirrelease is permanent and eco-friendly.

#### DRYOXCCELL

DRYOxccll is a quick-dry technology that wicks moisture away from the skin and disperses it in the fabric over a larger area, protecting against saturation. This accelerates evaporation and keeps you drier, longer.

### INSULATION

#### POLARTEC® ALPHA®

Polartec® Alpha® is the first high performance fabric to materialize the concept of active insulation. The low density fibers between air permeable woven layers create a more efficient fabric for regulating warmth and transferring moisture. It speeds up dry times.

#### MERINO WOOL

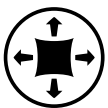

Merino wool helps to keep cool in summer and warm in the winter. The structure of the fiber naturally traps air which promotes excellent insulation. Merino has a good moisture management and an excellent odor resistance which is really well received into the sports apparel. Merino garments are soft and comfortable against the skin.

### OTHER TECHNOLOGIES

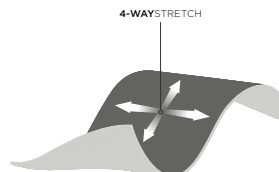

#### RE-SOURCE

At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

#### DUROXPAND

A four-way stretch fabric, DUROxpand gives you the freedom of movement and flexibility for adventures that require a greater range of motion.

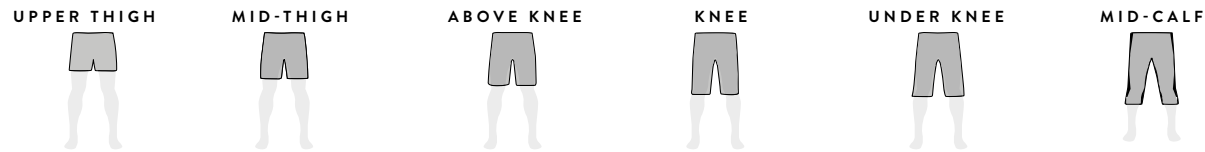

#### C0 DWR OR PFC-FREE

Perfluorinated and polyfluorinated compounds, also known as PFCs, are a group of fluorinated substances that have long been used as durable water repellence for clothing in the outdoor industry are very bad for the environment because they are very stable, and do not easily break down in nature. Therefore, PFC free/ C0 DWR treatments have been developed. They are less durable but more sustainable.

SHORTS LENGTH

The length is always depending on the body height and the body proportion on each person.

# HOW TO MEASURE CORRECTLY:

## 1. CHEST

Circumference is measured under the armpits and at the level of the widest part of the bust/chest.

## 2. WAIST

Circumference at the natural waistline between the highest part of the hip bones and the lower ribs.

## 3. HIP

Circumference of the trunk is measured around the fullest part of the hips.

## 4. INSEAM

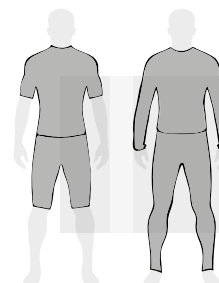

The vertical distance between the crotch level; the mass equally distributed on both legs.

## SIZE CHART

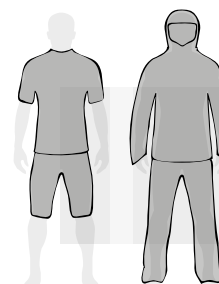

### FIT GUIDE

To accommodate the needs of a wide range of athletes and end users, SCOTT has developed a comprehensive fit system to meet the needs of each individual.

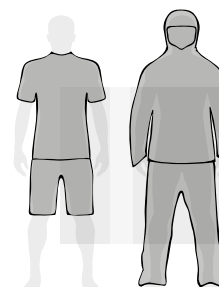

#### SLIM FIT

Narrow cut lines conform to the body's contour for the closest fit.

#### ATHLETIC FIT

Performance cut lines produce a close-fit ideal for active pursuits.

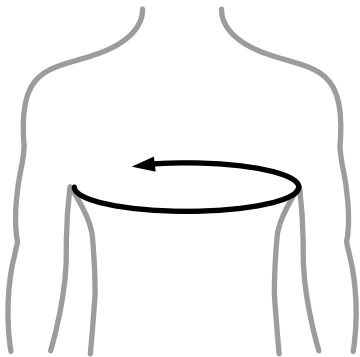

#### REGULAR FIT

Traditional cut lines for a stylish look and a classic fit.

## S U N G L A S S E S

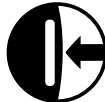

### AMPLIFIER LENS TECHNOLOGY

Ultimate vision from a lens comes from perfectly integrated details. SCOTT's Amplifier lenses filter what the eye sees, resulting in improved contrast, clarity and amplified vision, ensuring your performance is elevated, no matter the terrain.

### POLARIZED

Polarized lenses filter the light to reduce glare and eyestrain. They block bright reflections from different surfaces, like snow, water, or road surfaces. When glare is reduced you can see your surroundings clearer.

### ACS

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

### AMPLIFIER LIGHT SENSITIVE

AMP LS combines the contrast enhancing feature of Amplifier Lens Technology, with photochromatic technology.

### ADJUSTABLE NOSEPADS

The adjustable nose piece allows for truly conforming, individual fit. Just as no two people are alike, neither are their noses. This custom-fit piece offers superior grip and unparalleled comfort.

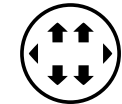

### OPTIMAL FIELD OF VISION

Having a cylindrical or toric lens shape, allows for optimal field of vision.

### HINGE FLEX

The innovative hinge flex construction paired with the textured temple tips minimizes pressure points while providing supreme grip.

### MAXIMUM FIELD OF VISION

Having a frameless design and cylindrical or toric lens shape, allows for maximal field of vision.

### UV PROTECT

All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

# RUNNING FOOTWEAR

## SCOTT SUPERTRAC SPEED RC SHOE

417781

black/safety yellow

We have a shoe for every type of terrain. The SCOTT Supertrac Speed RC adds to the collection and is your go-to shoe for anything from fell running, to mountain running, to obstacle course races. You'll never lose your grip thanks to a new tough and rugged outsole we have created specifically for this shoe. Mud or rock, rain or snow, you will be covered whatever the weather. One thing is for sure, you'll be fast when you hit the ground running in this robust shoe.

**COMPOSITION:** UPPER: Mesh/Thermoplastic Polyurethanes,  
LOWER: Ethylene Vinyl Acetate/Rubber

**RANGE OF USE:** Race, Trail

**HEEL TO TOE DROP:** 3mm

**APPROX. WEIGHT:** 215 g

**SIZE:** US 7-13/UK 6-12/EU 40-47.5

**FIT:** Athletic

**FEATURES:**

- Softground traction
- AeroFoam+
- ERIDE Midsole
- Lightweight Cordura Mesh with TPU Upper
- Toe Guard
- KPU protection

## SCOTT SUPERTRAC SPEED RC WOMEN'S SHOE

**HEEL TO TOE DROP:** 3mm

**APPROX. WEIGHT:** 195 g

**SIZE:** US 5.5-11/UK 3-8.5/EU 36-43

**FIT:** Athletic

**FEATURES:**

- Softground traction
- AeroFoam+
- ERIDE Midsole
- Lightweight Cordura Mesh with TPU Upper
- Toe Guard
- KPU protection

## SCOTT SUPERTRAC RC 3 SHOE

422579

black/safety yellow

MATRYX® ER2

Follow our athletes lead with the Supertrac RC 3 as your ultimate companion for conquering rugged terrains and pushing your limits. Say goodbye to distracting debris and hello to focused trail time with the addition of an Anti-Debris Sock. Durability is unrivalled through a strong Matryx® upper and comfort is prioritised through a Kinetic Light Foam. Elevate your performance, embrace the thrill of the trail, and set new personal records with a shoe designed to exceed your expectations.

**COMPOSITION:** UPPER: Mesh/Thermoplastic Polyurethanes, LOWER: Ethylene Vinyl Acetate/Rubber

**FIT:** Performance

**FEATURES:**

- Radial Traction
- Matryx® Upper
- Full-length Kinetic Light Foam
- ER2 - Evolved Rocker Technology
- Anti-Debris-Sock
- Toe Guard

**RANGE OF USE:** Race, Trail

# RETAIL CONCEPT & MERCHANDISING

# COLOR & MATERIALS

Color and material selections are carefully curated to enhance SCOTT's products. They are durable and authentic, making the concept a reliable investment for retailers.

# WALL SECTIONS

The SCOTT Retail Wall Sections serves as the cornerstone of the SIS concept. With its high-level product display and captivating image possibilities, it creates an attention grabbing atmosphere within the store environment. Whether fixed to permanent walls or freestanding to create new exciting customer paths, the wall sections enhances the store's visual appeal and elevates the overall customer experience.

## IMPLEMENTATION OF WALL SECTIONS

When planning for the implementation of wall sections, it is essential to prioritize the customer experience. If there are existing permanent walls available for attachment, the use of freestanding wall sections may not be necessary, although they can still serve the purpose of dividing product categories.

The concept of wall sections can also be effectively employed in a freestanding manner when creating a new customer path within a store, without the need for constructing new permanent walls. It is important to carefully measure the intended areas and ensure that there are no obstacles to the construction, such as ventilation systems, etc.

Subsequently, the order should be planned starting from the left, as outlined below...

# FABRIC FRAMES

The use of images in retail design plays a key role in creating an engaging and attractive shopping environment. They foster an emotional connection with customers, enhance the visual appeal of spaces, and guide consumer behavior. Images serve to highlight specific products, promote offers, and reinforce brand identity. Therefore, strategic use of imagery is crucial for a successful retail experience, promoting sales, building brand loyalty, and standing out.

# ELECTRONIC DATA INTERCHANGE

## WHAT IS EDI – ELECTRONIC DATA INTERCHANGE

Improve your business efficiency and simplify work with SCOTT's electronic data interchange (EDI) SOLUTION. EDI is a solution for computer-to-computer exchange of business documents in a standard electronic format between business partners.

These business documents cover a wide range of options from placing an order, fulfilling the product database with prices, EAN code, product descriptions, or even exchanging electronic invoices, and in some contexts, optionally exchanging stock level information.

### WHO CAN BENEFIT FROM OUR SCOTT EDI SOLUTIONS?

EDI is an electronic format that every business can use, so long as both partners have Business Software compatible with EDI solution.

If you are unsure, contact your IT service provider and ask!

### HOW MUCH DOES EDI INTEGRATION COST?

SCOTT offers a range of EDI integration solutions in different data formats. We do not charge anything for the service of integrating with your EDI-ready solution.

The only cost for you would be the cost of enabling EDI capability on your Business software, with your habitual IT service provider.

### WHAT EDI SOLUTIONS DOES SCOTT OFFER AND HOW COULD I BENEFIT FROM THE SERVICE?

#### STEP #1

Check with your IT provider if you can handle EDI integration, and what it would cost for you. To make the process smoother you can share the technical documentation delivered here:

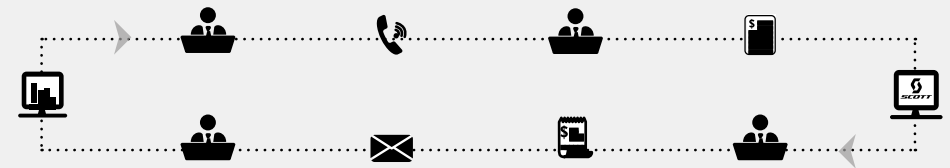

[WWW.SCOTT-SPORTS.COM/EDI](http://WWW.SCOTT-SPORTS.COM/EDI)

#### STEP #2

If your IT Provider confirms your ability to benefit from EDI integration, please contact your usual SCOTT Sales Representative or SCOTT Customer Service, they will deliver all the necessary information for organizing the next steps.

## TRADITIONAL INFORMATION EXCHANGE

## SCOTT EDI SOLUTIONS HELP YOU TO BECOME MORE EFFICIENT

By proceeding with IT connection between our Business Software and your Business Software, both yourself, your collaborators and SCOTT's employees

- ✓ Avoid manual operations
- ✓ Save employees time
- ✓ Avoid human error
- ✓ Simplify business documents and information exchange

## WITH EDI AUTOMATIC EXCHANGE
