

Tenson Spring & Summer 2026 Seasonal Colour Palette.

A spring & summer inspired colour palette dominated by a mix of earthy pastel tones topped with Tenson MPC Technology functionality .

This is Tenson's contemporary take on the classic timeless trench coat - the Trench Nouveau, which embodies a simplistic functionality as well as elegance and versatility. Made in 100% recycled polyester powered with Tenson's proprietary MPC Extreme technology, taped seams and water-repellent zippers - making it wind and waterproof with a PFC-free water-repellent surface. The Trench Nouveau is a stylish outdoor apparel piece for all weather conditions.

Trivia: Did you know that the khaki-colored trench coat was originally developed for the British Army officers before the First World War, becoming popular while used in the trenches. It was originally made from gabardine made waterproof by using lanolin before weaving. Today it is powered with Tenson's waterproof proprietary MPC technology keeping you dry and comfortable all year around no matter the weather.

Trench Nouveau Women.

SEK **4.000**

EUR **350** DKK 2.600

This is Tenson's contemporary take on the classic timeless trench coat - the Trench Nouveau, which embodies a simplistic functionality as well as elegance and versatility. Made in 100% recycled polyester powered with Tenson's proprietary MPC Extreme technology, taped seams and water-repellent zippers - making it wind and waterproof with a PFC-free water-repellent surface. The Trench Nouveau is a stylish outdoor apparel piece for all weather conditions.

Trivia: Did you know that the khaki-colored trench coat was originally developed for the British Army officers before the First World War, be-coming popular while used in the trenches. It was originally made from gabardine made waterproof by using lanolin before weaving. Today it is powered with Tenson's waterproof proprietary MPC technology keeping you dry and comfortable all year around no matter the weather.

We've got your back!

MPC Extreme X[™] - our brand new MPC[™] level is our highest grade - combines extremely effective waterproof properties with exceptional breathing performance. Guaranteed waterproofness of at least 20.000mm.

MPC Extreme™ - our second highest grade - combines extremely effective waterproof properties with exceptional breathing performance. Guaranteed waterproofness of at least 10.000mm.

MPC Plus™ combines very effective waterproof properties with effective breathability properties suitable for everyday, active outdoors lifestyles. Guaranteed waterproofness of at least 8.000mm.

MPC™ combines effective waterproof properties with a good breathing performance, making Tenson garments featuring MPC™ suitable for everyday active lifestyles. Guaranteed waterproofness of at least 5.000mm.

Tenson's AirPush™ Insulate offers lightweight, voluminous insulation for coldweather conditions. The featherless padding is designed to provide excellent breathability, moisture transport and movement making it ideal for the super-active outdoor adventure traveler.

Tenson AirPush™ is a lightweight microfibre technology focused on improving breathability, suitable for strenuous activities which require maximum comfort and breathability along with wind and water resistance. Made possible by the high density of the fabric (+30% higher than conventional fabrics).

TENSON TECHNOLOGIES.

Waterproof. Windproof. Breathable. $= \mathbf{MPC}^{\mathsf{TM}}.$

We've got your back in terms of function and laminate! We've been on a quest to withstand wind and water since the early 1980s when we at Tenson launched our self-developed MPC (Moisture Permeability Coating) laminate that keeps you dry and comfortable.

Tenson's MPC technology: developed to withstand wind and water since the early 1980's keeping you dry and comfortable no matter what weather mother nature might throw at you.

The MPC laminate causes the rainwater to drain off the garment. At the same time, the condensation / moisture that comes from the body is transported into and through the garment. In other words, MPC allows the garment to "breathe" so it feels comfortable to wear even during demanding activity. Our MPC garments also are taped at seams to add additional wind- and waterproof protection.

Tenson MPC features four performance grades - MPC Extreme X, ™ MPC Extreme™, MPC Plus and MPC:

Tenson's Power Comfort™ Insulate offers lightweight, voluminous insulation for cold-weather conditions. The featherless padding is designed to provide excellent breathability, moisture transport and movement.
