

Think!

for your self.

FOR ALL THOSE
**with a floral
mindset.**

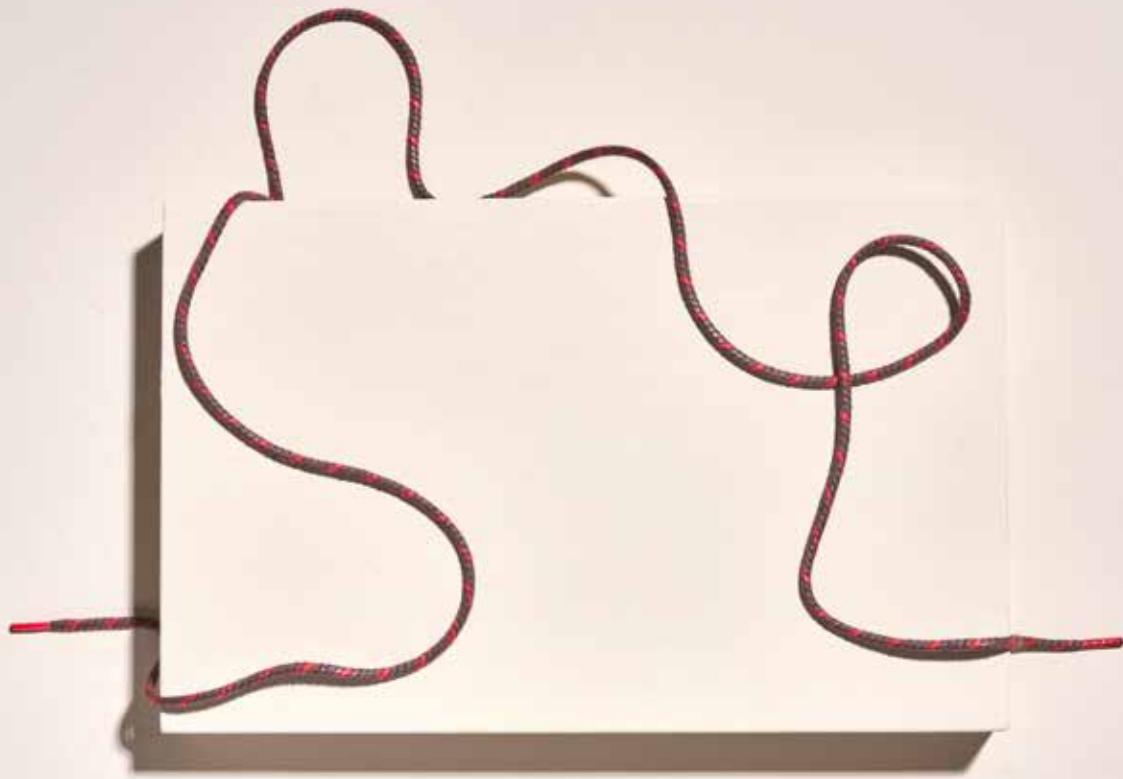

DESIGN for individual needs.

We love our shoes,
we love where they come from
and how they are created.

:::::: We make shoes that bring lasting joy. We are able to do so because we place great value on timeless design and quality.

For all those for whom
ordinary is overrated.

:::::: We play with a hugely varied range of design elements in order to do justice to the endless spectrum of individuality.

SUSTAINABILITY from start to finish.

We assume responsibility for ourselves and for our environment. This is why we produce our handcrafted shoes in **Europe – fair, resource-friendly** and with short transport distances. We use almost exclusively **natural materials** and do not take more from the environment than we can give back again. Sustainability has always been our company philosophy.

All of these efforts have been rewarded with the **Austrian Ecolabel** and the **Blue Angel certification**.

1st place

in the fields of **sustainability, environmental protection and fair production**.

In a new study conducted by the textiles industry, Think! was recognised by retailers for its sustainability, environmental protection and fair production.

For all those, for whom
sustainability is more
than just a buzzword.

THINK!

is a pioneer and has been sustainable for more than 30 years

FEET THAT FEELS LIKE they're wrapped in cotton wool.

A good shoe starts with the right last. At Think!, this is anatomically shaped and offers the perfect fit for feet. The removable insole, the functional profile, the flexibility, the cushioning, the high-quality materials and the breathable lining are what make Think! shoes stand out from the rest.

All the materials and leather used are tanned free of chromium, to the extent possible. Although this is a very elaborate procedure, this makes our leather both breathable as well as moisture-absorbent.

For all those,
who care about
style and comfort.

HIGH LEVEL OF WEARING COMFORT

Think! shoes bring joy each day with their functional profile, good cushioning, flexibility and a breathable lining.

REMOVABLE INSOLE

Almost all Think! models have a removable insole. The inserts are chrome-free from tip to toe.

HIGH-QUALITY MATERIALS

We value innovative materials and sustainable technologies. Our materials are high-quality and natural.

CHROME-FREE AND BREATHABLE

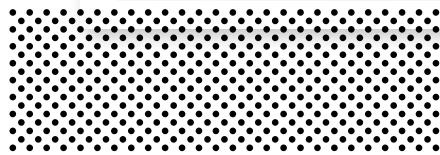

We tan all lining leather without using chromium. For people who are hypersensitive to chromium, we recommend models that are made completely of chrome-free tanned leather.

CRAFTSMANSHIP of the highest level.

We value every single step in the procedure. Think! unites the **highest standards of craftsmanship** with cutting edge industrial manufacturing methods. In up to **200 production steps**, shoes are hand-crafted in accordance with our strict quality criteria. Thanks to **innovative materials** and technologies, we are constantly increasing the potential of our shoes.

High-quality materials, repairability and replacement parts that can be ordered separately make Think! shoes into faithful companions and their wearers into loyal customers.

SUPPORT at the POS und online.

We believe in sustainable partnerships. This is why we support our partners in the long term and do our utmost to ensure our mutual success.

- ☒ High-quality POS materials for all surface areas
- ☒ Seasonal marketing packages for POS, offline and digital communication
- ☒ Contents for cultivating a personalised customer approach
- ☒ Training sessions for targeted customer service

BRANDED Space

Think! Store

◆◆◆◆◆ Natural and innovative: the combination of the modern concrete floor and the organic shape of the shelves directs attention to the unique design of the shoes. As of immediately, we now provide even more support for our dealers. Customised packages provide the finishing touch to your POS presence.

Think! Shop-in-shop

◆◆◆◆◆ Modern elements and natural surfaces distinguish us from other brands within the shop. The shop-in-shop concept sets store by simple design with a high recognition value. This brings the shoe to the forefront, where it takes on a starring role.

Think! Soft shop

◆◆◆◆◆ A minimalist, natural and contemporary language of form sets the stage to showcase every Think! shoe in the perfect light at the POS.

Think!

Sustainability, coupled with colours with a WOW factor.

XXXXXX If you interpret the new Think! collection as a symbol for the coming six months of the year, the spring/summer of 2025 will be carefree, colourful and radiantly beautiful, with small, exquisite surprises that inspire you to embrace life in a nature that is blooming. Individualists can look forward to designs made from natural materials in stylish colours and colour combinations with must-have finishes, as well as playful versions for outfits with a twinkle in the eye. Everything is coupled with the clear statement the Austrian footwear brand makes with regard to sustainability, quality, wear comfort and durability, and its approach to all of these, which makes no compromises.

The ultimate WOW factor; don't be afraid of colour!

The brightly coloured and individual, striking designs „Kumi“, „Turna“, „Koak“ and „Nature“ inspire you to try something new and add a large portion of happiness to your life, simply by making it a little bit fresher and more colourful.

Whether colour blocking, striking new and bright colour combinations or an „abstract painting“ in green or pink created with carefully arranged multicoloured dots, the new designs are bound to cheer you up! They share more than just a strong design language; in line with the Think! brand's principles, all of them are also manufactured in a sustainable way from natural materials, and this exclusively in Europe.

Feels like you're barefoot: Slip them on, and walk towards happiness.

Thanks to the use of particularly soft materials and extra-thin soles, the design „Nature“ feels perfectly natural and just like you're walking barefoot, even though you are wearing shoes. Our tip: in warm weather, simply leave your socks off for a change and wear them barefoot.

May we present: VIVI

A totally new design for the coming spring/summer is „Vivi“, which will appeal to all individualists who prefer natural and light footwear, but would also like to stand a little bit taller. These sandals with 4cm block heels come in various shades and versions, and perfect uncomplicated business and leisure outfits. This design proves that style and practicality work perfectly together.

Just pure: Clear-cut designs meet 100% chrome-free tanned leather down to the tips of the toes

For all those who love naturalness in combination with a clear, purist design, the classic, sportswear-inspired sneakers „Turna“ are the perfect footwear. Light, sophisticated colours and a straightforward silhouette give this athletic design its elegance and make it a true all-day-long choice.

As it is so important that only natural materials directly touch the skin, all of the Think! collection's designs are lined with chrome-free tanned leather all the way to the tips of the toes.

„Turna“ comes in classic white with Think! cotton shoelaces and the typical red Think! shoelace tips. From the spring/summer of 2025 onwards, „Turna“ is now also available with an appliquéd curly „T“, for example, or also in an extravagant metallic and powder or lavender combination for a more glamorous look.

A mix of good things! For a long (shoe) life

Playing with a combination of different materials is one of the most striking characteristics of all Think! designs, and the current collections „Turna“ and „Vivi“ are no exception.

Here, leather uppers have been combined with hemp – a 100% natural material – which results in a uniquely sophisticated look. This hemp comes from Spain. Besides the strict conservation of resources, this Think! design therefore also meets the requirements of the company's credo „100% made in Europe“.

The accessory with a twinkle in the eye and guaranteed favourite-potential

Do you want to take life not quite so serious and meet it head on with a twinkle in the eye? Then the loafer designs „Guad“ from the new Think! collection are exactly right for you. Exceptional, yet nevertheless casual, these accessory shoes play with artistic designs and ensure that their wearers make an eye-catching, unobtrusively charming style statement. The must-have effect already sets in as soon as you look at these small, sustainably manufactured works of art, whether the design in a colour called iced linen, the one in black with the image of a small cat on the uppers, or the elegant loafers with a floral print. Caution, though! For safety reasons, don't look at your feet all the time when you're wearing them.

Shoes are only as good as the conditions in which they have been manufactured

In the past, people took it for granted that you'd get your shoes repaired. In the western countries, you'd be hard pressed to find a cobbler to mend or repair your shoes these days. Shoes are therefore increasingly simply being thrown away. The main reason for this is that it is often cheaper to buy a new pair than to have them repaired. The sustainability pioneer Think! pursues a different approach: shoes should be worn for a long time, as only this is in line with the brand's core of sustainable slow fashion. Think! therefore offers an in-house repair service. If necessary, Think! shoes can be sent to the workshop at its headquarters, where they are repaired and made good. Currently, around 1,000 pairs of Think! shoes are therefore completely restored every year – and continue to be worn afterwards. We want to consistently increase this number.

The creative mind behind the new spring/summer 2025 collection

Think! has been a sustainable footwear industry pioneer for more than 30 years, long before many brands even began to consider the environment. Ever since Christoph Mayer took over the management of the brand in 2022, he has been rewriting the rules for the slow fashion pioneer from the Innviertel region in Upper Austria in order to adapt them to more urban and smart casual aesthetics. A new Think! look that is more integrating and matches the trends, but remains timeless and consistently pursues the brand's sustainability principles.

thinkshoes.com

About Think!:

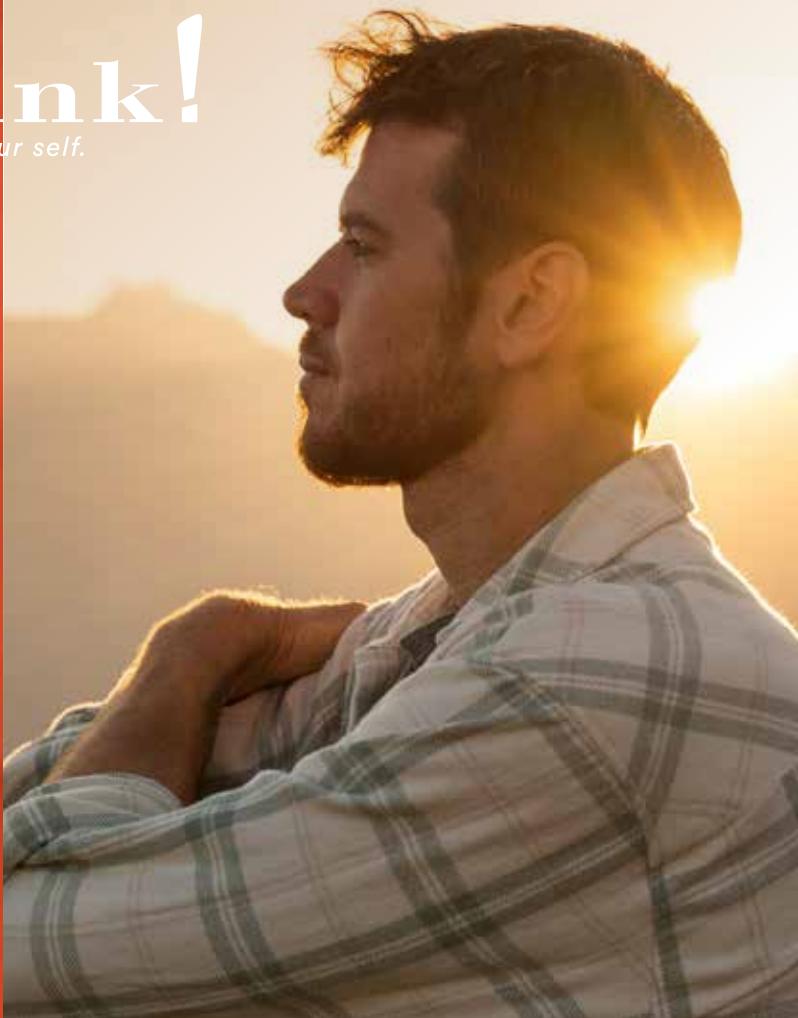

As a footwear industry sustainability pioneer, Think! has been offering high-quality sustainable women's and men's shoes with an individual design language that are exceptionally comfortable to wear for more than 30 years. Think! designs are made exclusively in Europe and produced in 200 manual steps by long-standing partners who have subscribed to a strict Code of Conduct. All of the materials used are sourced 100% from European suppliers. This ensures short transport distances and a carbon footprint that is as low as possible, and guarantees maximum transparency. An in-house repair service at the company's headquarters in Kopfing, Upper Austria, guarantees a maximum lifespan. Think! is a legero united brand. Besides Think!, the collections for the brands superfit and legero are also designed, manufactured and exported to over 40 countries under the umbrella of the family www.thinkshoes.com / www.legero-united.com
