World of Fajers

Hi,

Let me introduce you to Fajers and our first collection. This collection started with one product idea. This idea grew into a small collection based on movement, limitless possibilities, and a deep love for style.

Fajers is a brand that combines technology with natural elements and the words Feminine, Function, Fashion & Future are the four F that hold a strong position in the World of Fajers.

With curiosity for the technology of the future and a love for the mystical universe, Fajers is the result of an idea to combine the two and create a holistic lifestyle in a hectic world. Bringing jetsetters and busy bees the products they need to simplify their everyday life in a fashionable manner.

The company was named after my grandmother. Her maiden name was Fajers, pronounced fires. To me it represents the fire we all have inside of us.

Fajers is a mix of Scandinavian design and spiritual awareness. Fajers is about making a holistic lifestyle accessible for women on the go.

Love,
Mina
