

cphbags

Our story

As an independent **Danish business woman** with a busy day-to-day life, juggling home life with a husband and three sons with the welcome pressure of a business, entrepreneurship is favoured over television and reading novels.

'If you want something done, ask a busy person'.

This proverb could be about me, because I simply cannot stop developing ideas and I have a passion for environmental solutions. The material used for the **cphbags** is something that I am very pleased with as it has been made from recycled plastic bottles.

An actual need for a multi-purpose, durable shopping bag is what sparked the idea for my first **cphbags** model 1 – the patented shopping bag with separate compartments for delicate groceries. The bag turned out to be the perfect carryon for grocery shopping as well as ideal for computer gear, trips to the gym, changing necessities for baby, weekend trips and beyond.

Unique sustainable bags for everyday use!

Maria Nouvel Buch-Jakobsen

Our design

Danish design

Designed in Denmark by
Maria Nouvel Buch-Jakobsen

Material

Produced in 98% RPET
(recycled plastic bottles)

Straps

Strong straps produced in 100%
