FEATURES:

- A classic bag in a durable material that can withstand dirt, moisture and rough handling.
- Can be carried in hand, over shoulder or as a backpack.
- Storage compartment at side and also a mesh pocket in for easy access.
- Steady frame construction with big wheels.
- Retractable handle

DICTIONARY

EVA	Etyl Vinyl Acetat. Cushioning material for "low" impact.
Phylon	Moulded EVA. Cushioning material for "high" impact and long consistent cushioning.
HS Phylon	High Stretch Phylon.
Coating	A layer of natural or synthetic polymer that is applied to one side of a fabric in order to give it new properties. The coating is microporous which allows water vapour from the body to pass through the garment at the same time as it prevents liquid water from the outside to enter.

Bionic-Finish® ECO	Hydrophobic finishing with BIONIC-FINISH® ECO is based on a fluorine-free recipe. The finish is weatherproof, water-repellent, soil-repellent and keeps colours and fabrics looking new longer. It's also breathable and resistant to washing.
--------------------	--

Membrane	A microporous membrane is a very thin film that is either laminated onto the fabric directly or put as interlining between two different fabrics.
----------	---

Hydroguard®	HydroGuard is a polyurethane membrane which is wind-, waterproof and very stretchable. Moreover, HydroGuard is friendly to the environment.
-------------	---

Dry-Cat	DryCat is a membrane sock construction delivered with a guarantee to withstand Bagheeras new 100% waterproof standard. All styles with DryCat have been tested and confirmed for one hour in a dynamic water simulation.
---------	--

Washable	Shoes that have been confirmed for limited machine washing in 30° Celsius.
